Welcome to the HPC Center (HPCC)

2 minute read [View source code](#)

Overview

The High-Performance Computing Center (HPCC) provides state-of-the-art research computing infrastructure and training accessible to all UCR researchers and affiliates at low cost. Currently, it supports over 150 research groups with more than 800 active users. Its resources are also heavily used for instructing undergraduate and graduate classes in a wide range of computational, statistical, life science and engineering disciplines.

News

This year the HPCC was awarded an MRI equipment grant (#2215705) by NSF for Cluster in the total amount of \$942,829. For details see [here](#).
